# Android Fingerprint Login

Mobile Banking now includes fingerprint login capabilities for Android smartphones.

As with Apple Touch ID, members can now enable Android Fingerprint Login to allow quick access to mobile banking using any fingerprint registered on the mobile device.

Members can enable Android Fingerprint Login from the 'More' menu. If members do not already have fingerprints registered on the device, they will be instructed to set up at least one fingerprint on the device first.

Once members have enabled Android Fingerprint Login, they will automatically be prompted for a fingerprint when the app is launched.
